Description

The Limes bed maintains the intelligent functionality that characterises the sofa line but has been adapted for a different interior area and function. The lightweight mobile island appears to be floating on its 14cm rectangular transparent legs. It can become something else by simply adjusting the position of the two metal headboards that can be placed anywhere along mattress's entire perimeter. Fully removable covers.

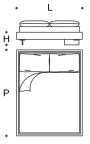

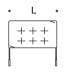

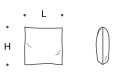

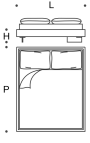

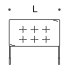

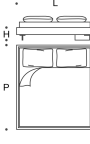

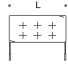

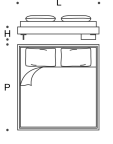

The versions with 180x200 cm and 193x203 cm bed base have an additional central support foot.
The leather covering implies additional stitching.

Structure - Padding

It includes the bed base with wooden slats. Bedframe is in wood padded with polyurethane foam clothed with velfodera coupled to polyester fiber 150gr/sqm. The headboard supports are in metal with chromed finish. Optionally they can be clothed in quilted fabric padded with polyester fiber or can be clothed with bands of fabric coupled with pressed 300gr/sqm.

Feet

14 cm high, in transparent methacrylate with rectangular section.
